TERRORDURE / RUBBISHEARTH Version 2 (2012-2016)

A crumpled Earth in a kind of ashtray showing various pollutions (all images from Wikimedia [©] creative commons) and supported by 4 legs printed with the symbols of the main currencies. This is an obvious reference to the fate of our planet and Humanity, handled by finance - more for the worse than for the better.

Thanks to the **Mcor** company team, realized with the Mcor IRIS full-color 3D printer, which uses paper for making parts: a more ecological process.
