COSMOGONIE

2015-2017

~

Impression 3D
sur Rapman
FDM / ABS

COSMOGONIE is a work whose the title gives the topic.

From bottom to top, we see the evolution of the universe, from the original big-bang (invisible point of departure from the spiral of the base) to the emergence of humanity, in passing through the particles, atoms, living matter ...

Ideally, this sculpture should be made of marble, quite large (2 to 3 meters high).
